TUESDAY MORNING, NOVEMBER 18, 1866.

The San Antonio Herald says the headquarters of the Department of Texas will be removed by General Heintzelman from Galveston to San Antonio, on account of the operations on the border.

THE Board of Education of New York have voted to approve the report of its finance committee, already published, appropriating \$2,522,000 for the support of schools during the year 1867.

The foreign papers speak of the continued illness of Count Bismark, which they describe as a prostration, accompanied by loss of appetite. Private letters so far confirm this, as to speak of an attack of paralysis.

The Texas Legislature has got through its business, and is ready to adjourn. Nearly all the important acts have already been passed, such as the stay law, the laws reorganizing the District Courts, the Supreme Court and the County Courts, an apprentice law, a law governing labor contracts, &c.

The votes which have been thus far taken in the several Annual Conferences of the Southern Methodists, indicate the ratification, by a large majority of the proposed change of the name of the Church to Episcopal Methodist Church, and the proposed introduction of lay representation into the General Conferences.

The health of Prince Pierre Napoleon Bonaparte has lately caused some unexiness to his friends. Having been suffering from carbuncle, he was operated upon at Aix-le-Bains, but without effect. On his return to Auteuil Dr. Nelaton again performed an operation, and hopes are now entertained that the Prince will soon be convalencent.

King Victor Emmanuel has just instituted a new order of linighthood, to be called the Order of the Leone di St. Marco, according to some; that of the Italian Lion, according to others. It is to take rank immediately after the Order of the Annunziata, which last is only given to crowned heads, members of reigning houses, and generalissimos.

We learn from Le Nord that cholera has been vory virulent in Belgium. Official statistics just published state that from the commencement of the epidemic to the 15th of September, the number of attacks have been 49,558, and the number of deaths 27,340, or more than half the total number attacked. The population of Belgium is 4,940,570, so that the scourge has carried on 1-87 per cent. of the inhabitants.

ONE Herr Risinger, an architect, asked an audience of the Duke of Hesse-Darmstadt, his sovereign. His behavior awakening suspicion he was arrested, searched, and found in possession of a long double-edged knife. In his rage he stabbed one of the policemen near him. It is supposed that he meditated murdering the Duke, whose Austrian leanings seem to have excited his revenge.

In Maine the squirrels, red and gray, are more numerous and bolder this year than ever before within the memory of the oldest inhabitants. The scarcity of nuts in the woods, or the prospect of a severe winter, or something else, drives them into towns and villages. The farmers complain bitterly of their depredations. They gnaw holes through the roofs and sides of their buildings, and make themselves a nuisance generally.

A Louisville dispatch of the 8th instant says:

A Louisville dispaton of the stn instant says:
The train leaving here at five o'clock yesterday
afternoon for Nashville, was maliciously thrown off
the track at Sinking Creek. The engineer was
badly hurt, and at last accounts the fireman had
not been found. The Adams Express car, baggage
car and smoking car were burned, and the passengers are said to have been generally robbed. No
passengers injured.

The records of the Commissioners of Emigration show that during the month of October 19, 80 passengers arrived at the port of New York, 14,377 of whom came by steamers, and 4703 by sailing vessels. Nine thousand of the number were from Germ ny and about 8000 from Liverpool. Sixteen hundred have gone to Illinois, 900 to Massachusetts, 600 to Michigan, 600 to Missouri, 685 to New Jersey, 1317 to Ohio, 2214 to Pennsylvania, 567 to Wisconsin, and 8471 have remained in New York. None came South. Why?

The Yale catalogue for the new college year is just out. Its summary of students is as follows: In theology, 30; in law, 26; in medicine, 31; in philosophy and arts, 122; total 209. Seniors, 101; juniors, 115; sophomores, 132; freshmen, 152—total, 500; aggregate, 709.

The libraries of the college, exclusive of the 2500 volumes of the Oriental Society, contain 77,500 books, besides a large number of pamphlets. The faculty and instructors of the college consists of the president, thirty-five professors, nine tutors, four instructors, a librarian, and a demonstrator of anatomy.

MOST DEPLORABLE IGNORANCE.-A rece of the British Quarterly Review contains the following astounding-nay, almost incredible revelations of the ignorance which exists among some sections of the British community:

sections of the British community:

In Birmingham thirty-two persons, averaging more than twelve years of age, including a young man of twenty, and two young women, could not tell the Queen's name. The commonest and simplest object of nature, such as flowers, birds, fishes, mountains and the sea, were unknown. Some thought London was a country, one that it was in the exhibition; a violet was said to be a pretty bird; a primrose a red rose; lilac also a bird; but wheather a robin or an eagle were birds none could say; some knew not what a river meant, or where snow comes from; and a cow in a picture was pronounced to be a lion. Multitudes of these poor children can never have seen a primrose by the river's brim, or heard the song of the lark.

The editor of the Manitowoo Tribune has been in Milwaukee, and in his paper of the 1st inst.

Never were we more impressed with the prosperity of the State than we were a day or two ago in Milwaukee. The improvements going on there are really astonishing, and it enforces the belief that Wisconsin is to be one of the greatest States in the Union; for cities seldom go abcad of the surrounding country—they are generally behind. Here are a few figures showing some of the amounts expended on new buildings during the present year:

This is a fair showing for the City of Bricks. We hope her prosperity may never be less.

## DORBAUM & MENKE, Berren Rleidermacher,

MERCHANT TAILORS.

OPINIONS OF THE PRESS.

The Louisville Journal says: "The testimonials which Dr. Gardner presents to the public could never have been obtained, except by the display of great skill and learning in his profession. One thing especially commendable in the Doctor's practice is, that he will not attempt an incurable disease for the sake of a fee, but frankly tells the patient whether he can be cured or not. We cheerfully recommend Dr. Gardner to the attention of all our friends who may be suffering from diseases of the eye and ear.

The Richmond Times says: "We have no hesitation in saying that Dr. Gaydner is the most scientific and successful eye and ear surgeon in this country." Dr. Gardner's treatment of the eye and ear is wonder ul.—Richmond Enquirer.

We feel justified in recommending Dr. Gardner to those suffering from diseases of the eye and ear. [Richmond Whig.

We can safely and cordially recommend Dr. Gardner, who will fulfill all he undertakes to perform. (Baltimore Clipper.

The New Orleans True Delta says: "We can safely recommend Dr. Gardner as a successful operator on the eye and oar. He will not undertake to treat a case unless a cure can be effected.

The Wheeling Register says: "Dr. Gardner is one of the most successful Ocullets and Aurists in the country. We advise those suffering from the diseases of the eye and ear to consult him."

DR. LAWRENCE'S

CELEBRATED ANTI-SYPHILITICA

FOR THE CURE OF SYPHILIS IN ALL IT FORMS.

THIS EXTRAORDINARY AND TRULY VALUEABLE Medicine is prepared with the utmost skill and care by a regular graduate of Medicine and Pharmacy, from fresh SOUTHERN MEDICINAL ECOTS AND HERBS, and is therefore

ENTIRELY VEGETABLE.

AP It completely neutralizes the peculiar Syphilitic poison, and cradicates every particle of the taint from the system forever.

AP This is not a remedy that MAY OUR3, but one that DOES and WILL OURE every case without failure, when taken according to directions.

AP Neither is it a remedy to be tried, but one that has been tried and thoroughly tested in some of the very worst cases of secondary and tertiary Syphilis, and in overy case it made a complete cure, and gave the sufferer a new lease of life, health, strength, and happiness.

A FEW RECOMMENDATIONS FROM PHYSICIANS

Dr. mase, or Estimore, and, says: "Your remeny is performing truly marvellous our es in this city."

Dr. Smith, of New York, writes: "I have fairly tested your ANTI-SYPHILITIO in as bad cases as I could find in the city, and in every instance if made a complete and rapid cure. It really seems to possess almost magical powers."

magical powers."

We could procure numbers of certificates from patients, but of course delicacy would forbid them from signing their full names; but certificates anset small importance any how, as a fair trial will convince the most sceptical of the real merits of the Medicine.

READER, STOP! PAUSE! THINK!

positively sure to drive every vestige of the disease from your system at once, by taking LAWRENCE'S ANTI-SYPHILITIC. ANTI-SYPHILITIO.
